PROFILE

Passionate and detail-oriented B.Tech student specializing in Artificial Intelligence and Data Science with hands-on experience in web development, machine learning, and computer vision. Skilled in HTML, CSS, JavaScript, Python, and OpenCV. Proven ability to build responsive websites and AI-based systems. Seeking to leverage my technical skills and creative mindset to contribute to innovative software development projects and become a full-stack developer.

PROJECT EXPERIENCE

AI-Based Exam Proctoring System

(2025 - PRESENT)

- Developed an AI-powered exam proctoring system using Python and OpenCV.
- Achieved 92% accuracy in detecting suspicious behavior through face and head pose tracking.
- Deployed the solution in test environments, reducing manual proctoring workload by 60%.

Responsive Portfolio Websites

2024 - 2025

- Built and launched 3+ portfolio websites using HTML, CSS, and JavaScript with modern UI design.
- Improved load speed and responsiveness across devices, resulting in 100% Lighthouse performance scores.
- Integrated Formspreet to enable secure and functional contact forms.

GitHub & Open Source Contributions

2024 - 2025

- Contributed to 10+ open source projects on GitHub, improving documentation and fixing bugs.
- Used Git for version control and managed branches for collaborative development.
- Automated issue tracking using GitHub Projects, reducing manual tracking time by 50%.
